

maurey

HIGH TORQUE DRIVE SPROCKETS

Performance Advantages

Maurey High Torque Sprockets provide a reliable, economical and trouble-free alternative to transmit power and reduce drive weight and cost when compared to chain drives and other types of belt drives.

Wide Range of Load Capacities

High Torque Sprockets are designed for high capacity performance exceeding the traditional limitations of chain and belt drives. The load capacity varies from fractional horsepower ratings to more than 600 H.P.

Engineered for Durability

High Torque Sprocket Drives are designed to minimize interference between the belt and sprocket during mesh, providing greater horsepower without slippage or speed variation. By designing belt teeth to disperse critical stresses, belt performance is improved, assuring longer belt life.

Space Saving Design

When compared to other belt systems, High Torque Sprockets permit a narrower drive, reducing the size of the drive and cutting component cost.

Alterations

Maurey will customize your High Torque sprocket needs to suit the application in which it is used. See list prices for below for various alteration charges

Rebore Minimum Plain Bore - List Price \$40.00

Keyway - List Price \$9.00

Set Screw - List Price \$9.00
